

### Sample Question Bank – Sewing Machine Operator Knits

**Q1. Machine settings should be checked according to:**

- A. Personal preference
- B. Manufacturer instructions and production requirements
- C. Fabric color only
- D. Operator convenience

Answer: B. Manufacturer instructions and production requirements

**Q2. If machine settings are found incorrect, the operator should:**

- A. Ignore the issue
- B. Inform the mechanic or supervisor
- C. Continue stitching
- D. Change the garment style

Answer: B. Inform the mechanic or supervisor

**Q3. For safe working, which machine parts should be fixed tightly?**

- A. Needles, foot, and spools
- B. Table and chair
- C. Fabric and trims
- D. Labels and tags

Answer: A. Needles, foot, and spools

**Q4. If materials do not meet specifications, the operator should report the issue to:**

- A. Security guard
- B. Supervisor or Quality Controller
- C. Storekeeper only
- D. Customer

Answer: B. Supervisor or Quality Controller

**Q5. Threads used in stitching should match:**

- A. Operator preference
- B. Required quality and color for the garment style
- C. Machine brand only
- D. Fabric supplier choice

Answer: B. Required quality and color for the garment style

**Q6. Before starting production, stitching quality should be checked on:**

- A. Finished garments
- B. Waste fabric
- C. Packing material
- D. Labels

Answer: B. Waste fabric

**Q7. Why should matching serial-number components be used together?**

- A. To increase production time
- B. To ensure correct assembly and quality
- C. To reduce thread consumption
- D. To avoid machine maintenance

Answer: B. To ensure correct assembly and quality

**Q8. After sewing a component, the operator should:**

- A. Send it immediately to packing
- B. Perform a self-quality check before passing it to the next operation
- C. Wash the component
- D. Replace the machine needle

Answer: B. Perform a self-quality check before passing it to the next operation

**Q9. During stitching, doubts or unclear instructions should be:**

- A. Ignored
- B. Discussed with co-workers only
- C. Clarified with the supervisor
- D. Recorded after production

Answer: C. Clarified with the supervisor

**Q10. Which sequence best represents sewing preparation activities?**

- A. Stitch garment → Check quality → Select thread
- B. Check machine settings → Secure machine parts → Verify materials → Select correct thread → Test stitching on waste fabric → Sew matching components → Self-check quality
- C. Select thread → Dispatch garment → Check machine
- D. Sew garment → Clarify instructions → Check materials

**Answer:** B. Check machine settings → Secure machine parts → Verify materials → Select correct thread → Test stitching on waste fabric → Sew matching components → Self-check quality
